PROFITECH M CONTROL SYSTEM

WAGNER offers devices, equipment and systems for all areas of industrial surface coating. Our innovative products and solutions stand out in terms of their quality, efficiency and productivity.
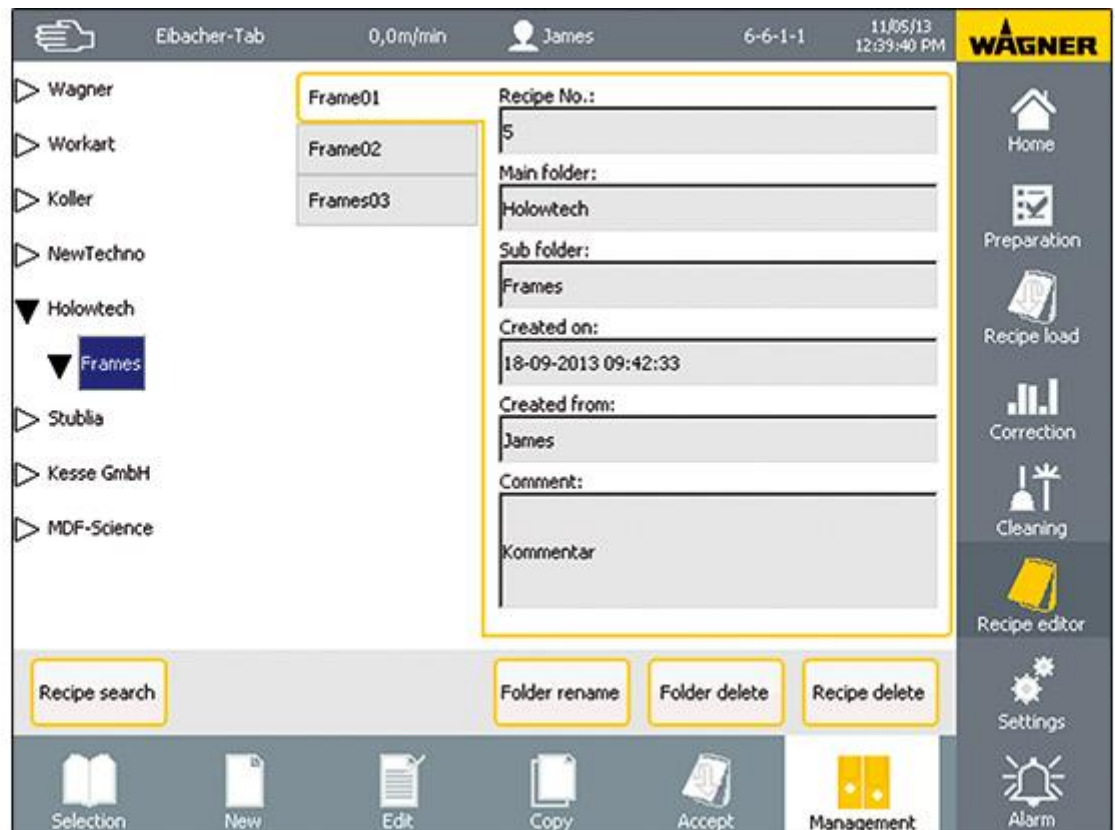

With the control system ProfiTech M, WAGNER offers an ideal solution specially developed for easy operation. The user benefits from a control system tailored to their individual needs. The user interface is designed according to the latest ergonomic principles to ensure maximum operating and coating efficiency.

- User-friendly visualization
- Touch & twist control concept
- Intuitive menu structure
- Optimization of powder consumption
- Wide variety of individually configurable functions

EASY TO OPERATE

All functions are controlled via a central display. The user-friendly operating panel is notable for its simple and accessible menu system. This enables the user to master even process-critical or complex processes such as color changes intuitively. Frequently used functions are available via a quick access facility.
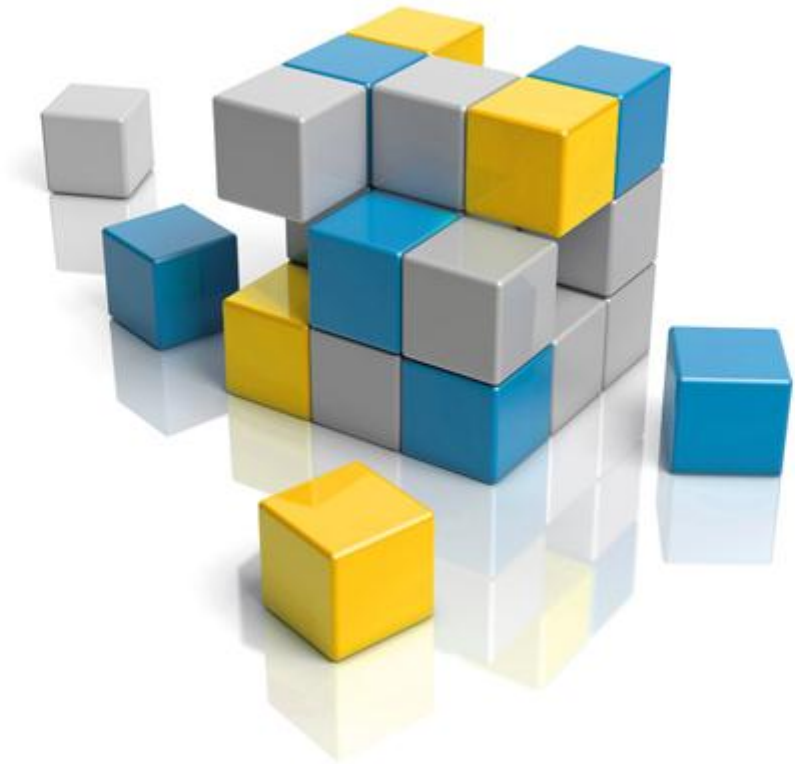

CONSISTENT QUALITY

Up to 1000 coating parameter recipes can be stored and assigned individual names. In this way, coating processes can be clearly archived and retrieved at the touch of a button. The recipes are managed in a logical and well organized folder structure.
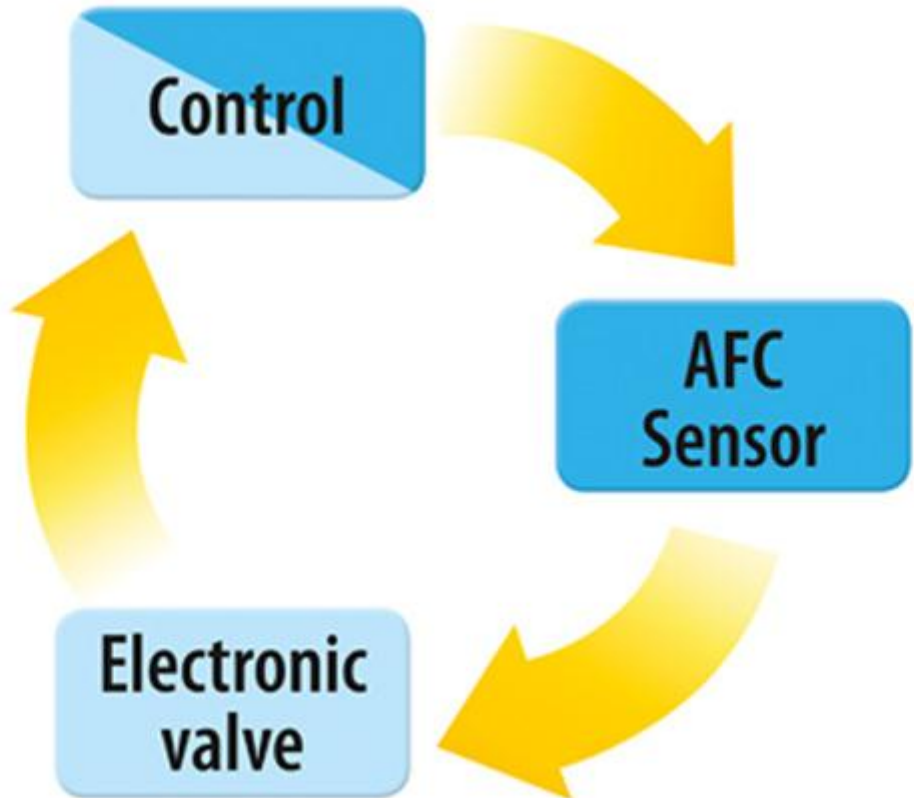

EASY TO UNDERSTAND

An overview of the system status, icon/text buttons and a logical menu structure ensure reliable process control.

OUR MODULAR PRINCIPLE

Flexible and perfectly coordinated components allow us to configure and assemble systems to suit individual needs.

OUTSTANDING TECHNOLOGY

AFC technology with genuine closed-loop control and an extensive range of functions ensure coating results that meet top quality standards.

THE BASIS: A PERFECTLY COORDINATED CORE CONCEPT

SIMPLE AS A MANUAL SYSTEM

Manual interventions are still possible even in an automatic system. Quick, safe and individual.

Clear menu structure with simple, logical pictograms:

- Header with system status
- Right menu bar

- Dynamic function bars along the bottom
- Graphics area for visualization

RELIABLE SYSTEM START-UP
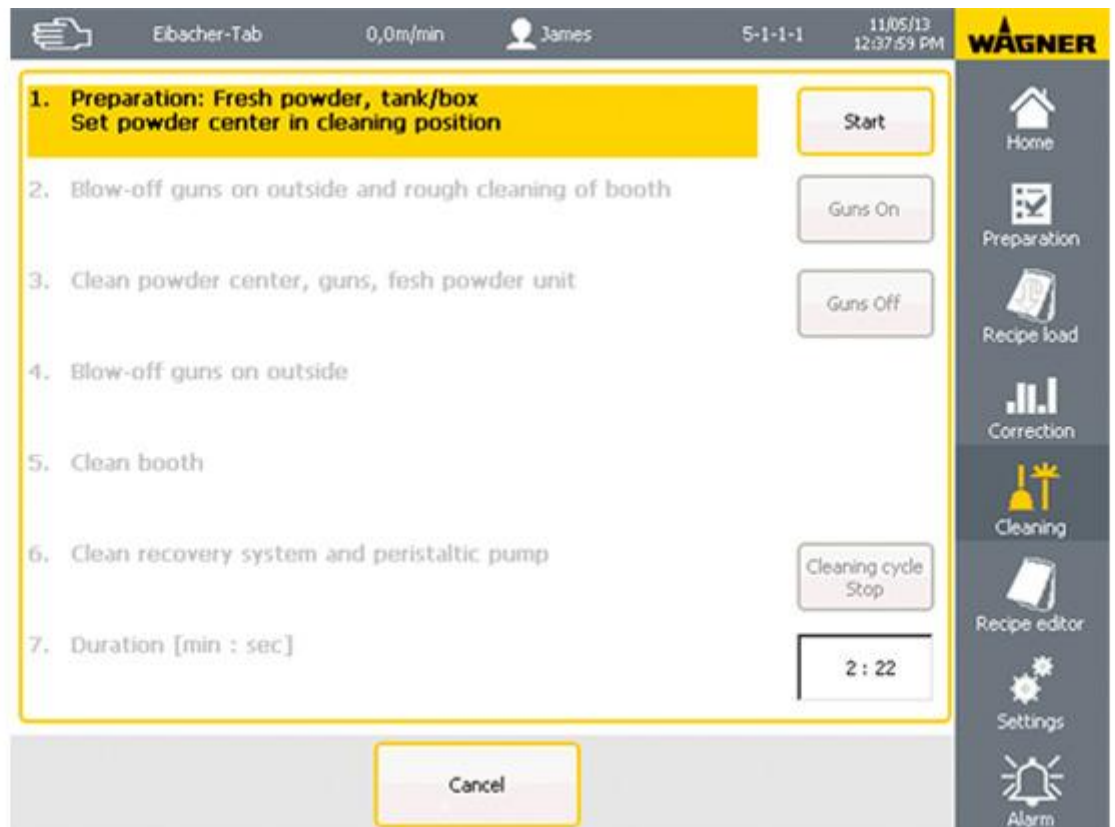

Step by step to automatic operation.

SET/ACTUAL VALUE

Display for analysis purposes.

RECIPE EDITOR

Touch-control recipe selection, customized structure and labeling.

COLOR CHANGE PROCEDURE

Interactive and correctly sequenced, recording of color change duration.
